I found a place that no one has seen before. It’s huge! It’s The Eiffel Tower! It is a phenomenal tower that looks over Paris. Stephen Sauvestre built the Eiffel Tower; it is 1,063' (324 m). It was built in Paris, France. It weighs 7,300 tons, while the entire structure, including non-metal components, is approximately 10,000 tons and it is the most visited paid attraction. It is 125 years old as of 2014. The Eiffel Tower is a symbol of France. It was constructed to commemorate the 100th anniversary of the French revolution. It was built in 1887-1889. After, they built it, it was erected in 1889 as the entrance arch to the 1889 World’s Fair, it was initially criticised by some of France’s leading artists and intellectuals for its design, but has become both a global cultural icon of France and one of the most recognizable structures in the
The Eiffel Tower is a beautiful site to see. Originally intended as a temporary exhibit, the Eiffel Tower was almost torn down and scrapped in 1909, but the city officials opted to save it after recognizing its value as a radiotelegraph station. You need to go see the Eiffel Tower because it's an amazing site.
